

Annual Asbestos Management Plan Activity Update for School Year 2016-2017

The purpose of this memorandum is to inform parents and staff of the Passaic Arts and Sciences Charter School located at 7 St. Francis Way, Passaic, New Jersey of the recent and planned asbestos management activities, pursuant to the periodic notification requirement of the United States Environmental Protection Agency's "Asbestos-Containing Material in Schools Rule" (40 CFR 763, Subpart E, commonly referred to as the AHERA regulation).

In accordance with the Rule, the school instituted Asbestos Management Plans to address Asbestos-Containing Building Material (ACBM) identified in the facilities.

The school continues to maintain other ACBM identified under an operations and maintenance program.

The last Three Year Reinspection required by the Rule was completed in 2017. Documentation of this Reinspection has been incorporated into the school's Management Plan documentation. Periodic surveillances and other consulting activities were performed in 2016-2017 by Rullo & Juillet, a qualified asbestos management consultant retained by the school for assistance in these matters.

The Asbestos Management Plan for this facility is available at their main office, as well as the iLearn's offices located at 465 Mola Boulevard, Elmwood Park, New Jersey 07407 during normal business hours. Questions should be directed to R. Arslan, Director of Facilities, at 201-773-9140 x140..
